CLASSIC METAL LURES

SEA TIGER

Sea Tigers are designed for medium to high speed **SPINNING, JIGGING** and **TROLLING**.

The **SEA TIGER** series are a classic baitfish profile made from high quality stainless steel.

These metal lures are designed for a medium to fast retrieve suitable for beach, rock, and estuary areas in both saltwater and freshwater environments.

Their darting and weaving action will attract a multitude of species that chase smaller bait fish.

Surf Rider

“ Surf Riders are mainly designed for medium to fast **SPINNING** but can also be **TROLLED** and **JIGGED** in certain environments. ”

The **Surf Rider** range brings back the "**classic**" metal spoon but with a modern shape and design. They are made from high quality stainless steel.

These lures are designed for a medium to fast retrieve depending on conditions and environments.

They are just as adaptable in small trout freshwater streams as they are chasing schools of larger tuna and mackerel at sea in the tropics or cast from a beach or rocky coastline.

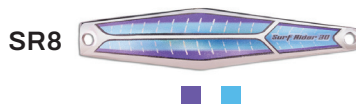

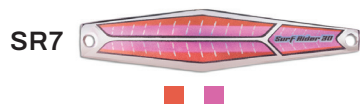

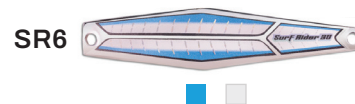

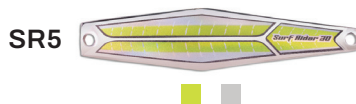

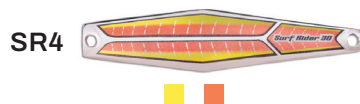

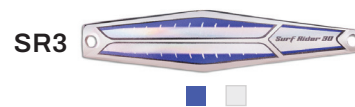

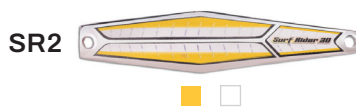

Being lighter with more kick, has obvious advantages in same areas. Their wavering action will catch a multitude of species.

MOD-JIG

“ Mod Jigs are designed for medium to high speed retrieves in many varied environments. ”

The **Mod-Jig** series are a versatile metal lure made from high quality stainless steel.

These lures are designed for medium to fast retrieves suitable for beach rock and estuary areas in both saltwater and freshwater environments. Their “**darting and weaving**” action will attract a multitude of species that chase smaller bait fish.

Although the primary use is casting and spinning from boats or shorelines, their rear weighted design is also excellent for jigging and often attracts strikes from the downward fluttering actions they create.

Lure size

LURE NO.	BODY LENGTH	WEIGHT
